COLOUR SCHEME

This screen allows you to change the colour scheme for your user login. The colours can be changed to either the current Windows scheme, or, the default Paxton scheme, or, customised according to the colours that you select.

Set colour scheme

These three options determine the operation of this program. Select the required option -

'Windows'	Will adopt the scheme currently set via your Windows system settings.
'Paxton'	Will cause the package to adopt its own default colour scheme.
'User defined'	Will enable you to choose the particular colour scheme for each screen in the software as selected in the right hand side of the screen.
Update	Only relevant when 'User defined' is selected. Allows the currently displayed user defined colours to be modified for the selected screen component.
Exit	Returns you back to the menu.
Record	Writes away the currently displayed details. Details can subsequently be modified using 'Update'.
Cancel	When in 'Record' mode will ignore any new selections.

			User Colours
Text Boxes	Label and Window Text		Text Colour (Text boxes etc.)
Text Boxes	Grid Colours		Background Colour (Text boxes etc
Text Boxes		_	Action Button Text Colour
Selection 💌		_	Action Button Background Colour
			Window Background Colour
Record	Butt	on Text	
Set Colour Scheme to:]
○ Windows ○	Paxton	User Defined
